

## Refills available

Refill boxes are available as a single (1.1 lb.) or a multiple with five (1.1 lb each) packs. The refillable Clean Box has a 1.1 lb pack plus a built-in brush for spot cleaning. Each single pack can cover up to 250 square feet of carpet.

The SEBO *duo-P* Clean Box is an environmentally friendly refillable container – when you have used the contents, you can replace the inner bag with an inexpensive refill pack of *duo-P* Cleaning Powder.

## SEBO - Respected Worldwide.

Professional users prefer SEBO worldwide. With good reason! Our success is due to our innovative products and our strong focus on quality. Modern technology, state-of-the-art design, and consistent customer focus are found in all SEBO products.

Performance

# Simple and easy to use:

### To clean the entire carpet:

- Spread *duo-P* Cleaning Powder evenly over the carpet.
- Work the powder into the carpet using the SEBO *duo* Brush Machine, which opens the carpet pile enabling the *duo-P* powder to clean around each separate fiber.

### To spot clean stubborn stains:

- Spread a small amount of *duo-P* powder onto the soiled area.
- Gently work the powder into the carpet using the brush provided with the SEBO Clean Box. Older or more stubborn stains may require further treatments. Simply repeat the process until the stain is completely removed.
- Once the *duo-P* powder has absorbed all of the dirt and the area is dry to the touch (approximately 30 minutes), simply vacuum the area thoroughly.

### How it works:

The SEBO *duo-P* Cleaning Powder is made up of granules that are moistened with detergent and is environmentally friendly and safe to use. When the granules are worked into the carpet fiber, soil and stains are lifted out of the carpet by the *duo-P* powder. The *duo* Brush Machine lifts the carpet pile ensuring all surfaces of the fiber are cleaned, leaving your carpet revived and softer. After vacuuming, your carpet is clean, dry and ready for use.

An added advantage in using *duo-P* Cleaning Powder on your carpet is that once applied, a built-in fiber protector will help to protect against future damage from soiling or staining.

Please note:

- For best results, vacuum carpet prior to applying *duo-P* powder
- Limited suitability for berber and needlepunch carpets
- Check for colorfastness
- Open window to speed drying
- Reseal package after opening to maintain moisture

### SEBO Warranty SEBO *duo* Brush Machine

## The Perfect Team- The SEBO *duo* Brush Machine and the *duo-P* Cleaning Powder

This dry cleaning system is formulated to DEEP CLEAN your entire carpet or spot clean stubborn stains – all without soaking your carpet. The SEBO *duo* Cleaning System – quick, easy and highly effective!

Extend the life of your carpets by not only vacuuming regularly, but also cleaning them regularly. Owning your own system is convenient and cost effective. Your carpets get cleaned when YOU want them cleaned and without having to let strangers into your home.

***duo-P*, the carpet cleaner that removes virtually ANY kind of stain.\***

\*Will not remove stains which have dyed the carpet fiber.

## The advantages of using the SEBO *duo* Cleaning System:

- no detergent residue
- no shrinking or mildew
- easy to clean stairs
- no need to move furniture
- alleviates house dust allergies
- cleans most types of carpet
- easy spot-cleaning
- immediate use of the carpet
- a built-in fiber protector helps to protect your carpet against future stains and soil

# Alleviates house dust allergies.

**The GAF allergy research center in Germany found in a long term test that, six months after a single cleaning with *duo-P*, seven out of ten carpets remained free of dust mite allergens.**

And because this is a DRY cleaning process, the SEBO *duo-P* Cleaning Powder WILL NOT PROMOTE THE GROWTH OF MOLD AND FUNGUS in your carpet and pad that wet extraction systems may cause.

By reducing dust mite allergens, pet allergens, bacteria and mold spores, the SEBO *duo-P* Cleaning Powder helps maintain indoor air quality for a healthier home.

## Why use dry extraction?

Wet cleaning methods inject hot water and detergent into the carpet pile under pressure. A vacuum is then used to extract the liquid and dissolved soil. It is impossible to vacuum all of the dissolved soil from a wet carpet. Many machines only remove 50% of the dirty water. Carpets may resoil quickly and spots may reappear as the moisture wicks back up the carpet fiber. A wet carpet may take 8-36 hours to dry depending on humidity. That's long enough for mold spores to grow. In fact, biological allergens thrive and multiply in moist or damp areas.

Dry cleaning is safer for most carpets – it will not shrink the carpet or cause water staining if applied unevenly. SEBO *duo-P* Cleaning Powder leaves no detergent residue to cause your carpet to resoil, and the carpet can be used immediately after cleaning.
